

Technical data sheet

Benefits:

- More energy efficient buildings and homes
- High insulating power in conduction, radiation and convection
- Adds sound insulation to impact noises
- Quick and easy to install
- The product acts as an air chamber

Thermal insulation

Ref ^a .	Length x Width (± 2%)	Area (± 2%)	Ø (± 5%)
LIGHT	62,5m x 1,20m	75m ²	± 55cm

Technical Data

Thickness	4mm
Reflection Coefficient	95 to 97%
Emissivity	3 to 5%
Usage Temperature	-25° to 80° (°C)
Hazardous Substances	Does not contain

Composition

Reflective insulation composed of two metallic sides and an air bubble inside.

Application Areas

- Construction / Rehabilitation of Buildings
- Modular Constructions - Wood, Light Steel
- Tents, Sunshades
- Packaging (Thermal Boxes, Containers)
- Thermal lunch boxes
- Reinforcement of existing insulation
- Additional waterproofing
- And much more...
